

Riedon REACH Statement

The European Chemical Agency (ECHA) has published the Substance of Very High Concern (SVHC) Candidate List. Once a substance is added to the Candidate List, REACH imposes immediate obligations on manufacturers and importers to declare the substances if present. Article 33(1) of the REACH Regulation states that manufacturers and importers of articles (products) are required to notify their customers of the presence of any SVHC in their products exceeding 0.1% by weight and provide instructions on safe use of the product.

Below is a summary of all Candidate Materials lists which have been published as of June 20, 2013. A complete list of all 144 current candidate materials can be found at this website address: <http://echa.europa.eu/web/guest/candidate-list-table>

Riedon, Inc. declares that none of the SVHCs included in the published lists below are present in quantities of greater than 0.1% in standard resistor products, as described on the Riedon, Inc. website, www.riedon.com.

Date of Recommendation or Inclusion	Number of Candidate Materials	Reference
